How to import Graphtec Pro Studio / Graphtec Pro Studio Plus data in Graphtec Studio 2

To load design data created with Graphtec Pro Studio into Graphtec Studio 2, you must save it as a PDF file.

Graphtec Studio 2 does not support Graphtec Pro Studio FS files, so you cannot open the design data as is.

Follow the steps below, save it as a PDF file from Graphtec Pro Studio.

- 1. In Graphtec Pro Studio, open the design data to be transferred to Graphtec Studio 2.
- 2. Select the [File]-[Export] menu.
- 3. The [Export] screen will open, so make the following settings and click the [Save] button (D).

File name (A): Enter the **name of the PDF file** to be saved. Save as type (B): Specify "Adobe PDF (*.PDF)". Suppress options (C): Uncheck the box.

💱 Export				×	
Save in:	Downloads	•	⇐ 🗈 💣 🃰 ◄

	<			(D) >	
	File <u>n</u> ame: (A) Save as <u>type</u> : (B)	Adobe PDF (*.PDF)	•	<u>S</u> ave Cancel	
Selection only Suppress options (C)					

- 4. The [PDF Options] screen will open, so make the following settings and click the [OK] button (G).
 - <For data that does not include contour cutline>

Scale to (E): Specify "Full size".

Include border (F): Check the box.

PDF Options	×
Scale to: Full Size (E)	
Downsample bitmaps: 300 📩 DPI	
▼ Include border (F)	
(G))
